Multiplication of Fractions

1. Multiply: $3 \times \frac{1}{3}$
2. Multiply: $7 \times \frac{2}{7}$
3. Multiply: $\frac{5}{4} \times 4$

Division

4. Divide: $8 \div 2$
5. Divide: $9 \div 3$
6. Divide: $5 \div 5$

Remember:

- Fraction is like doing division first then multiplication.

- Think division as in: I have ___ number of pokemons and if I want each of ___ group to have the same number of pokemons, how many pokemons should I give to each group?

- Do not think in your head, use hands or draw something to help you understand the problem.
